

I urge the FCC to reject the NAB's petition 04-160I. I pay for XM programming. The reason I pay for XM is because I can not receive comparable programming in my area. The unavailability of similar programming in my area is the SINGLE overriding reason I bought XM in the first place. There's nothing stopping the AM and FM broadcasters from improving their programming. XM is the result of services that are not available elsewhere. If AM and FM broadcasters provided anything even close to XM I'm sure XM would have more difficulty attracting paying customers. Why doesn't the FCC require AM and FM broadcaster to have better quality and variety in their programming?
